Training Highlights

- Live instruction via Zoom by Engineers and MDOT Certified Office Technicians from L.S. Engineering, Inc. with decades of experience in MDOT construction and FieldManager use.
- Introduction to the many applications (IDRs, Materials, Pay Estimates, etc.) within the FieldManager program and how they are used on MDOT-let projects.
- Navigation through a real-life project example in FieldManager on your own computer, alongside the instructor, to see and experience the applications and data input requirements within FieldManager that are used by MDOT Certified Office Techs.
- A Certificate will be issued following completion of the training to satisfy the • **REQUIRED** • prerequisite to the MDOT Computerized Office Technician Training. *(note: MDOT is offering FieldManager Training that will also meet the prerequisite)*
